

Editor Opinion, July 12th, 2024 (<https://www.seemorefacts.com/energy.html>)

Atlantic Shores Ocean Wind Turbines, Atlantic County, New Jersey

After much research and study, it is my opinion the Atlantic Shores Ocean Wind Turbines project, or any similar project, should not proceed.

Also, actions made by any government entity in the United States of America already taken to advance this project should be reversed or remediated if possible.

The reasons for my opinions are based on many factors, but the best summary I can provide is that this wind power project, like most, is a fraud.

Some of the specific sources and examples explaining this fraud can be found below:

I consider it a dereliction of duty for any relevant government entity in the United States of America, or representative thereof, not to review the information provided above with careful due diligence.

If such government entity in the United States of America, or representative thereof, then decides to proceed with the Atlantic Shores Ocean Wind Turbines project, or any similar project, I believe they are complicit in perpetrating fraud on the citizens and taxpayers of the United States of America.
